

# Dragonhyde<sup>™</sup>

HOOF BATH CONCENTRATE

**T-HEXX** Animal Health has developed a new and innovative hoof care product, formulated for use in hoof baths. Trends show that the dairy industry is moving away from traditional hoof bath solutions. Hydromer has developed a cost effective concentrated solution that promotes normal hoof health in the dairy cow.

*Costs less than buying other cleaning products AND enhancers*

- Promotes hoof hygiene
- No antibiotics
- No heavy metals
- Long lasting
- Water soluble
- Environmental barrier

**T-HEXX Dragonhyde** Hoof Bath Concentrate (**HBC**) is formulated to make 50 gallons of finished hoof bath. Unlike traditional hoof baths that come off once the cow exits the barn, **T-HEXX Dragonhyde HBC** technology penetrates the cracks in the hoof providing a long lasting barrier that remains on the hoof under environmental pressures. Stays on even hours after being exposed to mud, urine and manure slurry.

# A Hoof Bath With Long Lasting Barrier Qualities!

**T-HEXX® *Dragonhyde*™ HBC** creates a long lasting, highly visible environmental barrier that helps to promote a normal hygienic hoof environment in the dairy cow.

**Product Description:** **T-HEXX *Dragonhyde* HBC** is a blue-green liquid concentrate for dilution in water. The blue-green color gives a highly visible indication confirming the penetration depth of the product in the hoof as well as indicating the status of the impregnation by color intensity. A cleaned hoof once impregnated with a bath made from **T-HEXX *Dragonhyde* HBC** and water will remain on the hoof in any environment.

**General Product Use:** First fill bath with water. Next, slowly pour the correct amount of **T-HEXX *Dragonhyde* HBC** into the bath and gently stir. Use only as directed, in diluted form.

### Initial Use Graph (first 2 weeks)

Bath Capacity	Pre-Bath	Main Bath
50 gallons	1 gallon	2 gallons
100 gallons	2 gallons	4 gallons
150 gallons	3 gallons	6 gallons
200 gallons	4 gallons	8 gallons

### Maintenance Use (after 2 weeks)

Bath Capacity	Pre-Bath	Main Bath
50 gallons	1 gallon	1 gallon
100 gallons	2 gallons	2 gallons
150 gallons	3 gallons	3 gallons
200 gallons	4 gallons	4 gallons

**Economics:** One bath can last for up to 250 cows, depending on the level of manure and urine contamination. If a pre bath is used, the bath may last up to 350 cows. Note: **T-HEXX *Dragonhyde* HBC** does not use or contain heavy metals, providing for an environmentally friendly alternative while reducing contamination risks and waste disposal associated with current hoof baths.

**Safety considerations:** See MSDS

**Packaging size & how to order:** Product is available in 55 gallon drums. Tote quantities available upon request.
