

Dragonhyde[®]

Putty

For Topical Application

...combining quality with innovation

Adheres to the hoof without wraps

Great for use on species with hoof hygiene issues

Begins to work within days of application

T-HEXX® *Dragonhyde Putty* is a topical paste that is used for creating hygienic hoof conditions on individual animals. Best used during foot examination and trimming. This unique formula has excellent adhesion properties and can be used without hoof wraps. It is great for packing into hoof cracks or for use on other hoof issues.

T-HEXX *Dragonhyde Putty* helps to dry out the hoof while providing a gentle, non-irritating adhesion to the affected layers.

**Helps to stop bleeding in
under 10 seconds!**

Step 1

Clean the hoof thoroughly using a scrub brush and sanitizer. Completely remove any manure or other materials.

Step 2

Semi-dry the hoof. It does not need to be completely dry because **T-HEXX Dragonhyde Putty** adheres better to wet surfaces.

Step 3

Apply **T-HEXX Dragonhyde Putty** to the area of the hoof that needs attention. Use a brush, wooden tongue depressor or wear a glove and apply by hand.

Step 4

The material will harden to the hoof within 2 minutes, therefore the product can be used without wraps.

On Farm Pictures

DAY 1, Identification of hoof problem and application of *Dragonhyde Putty*

Within 8 days, After the removal of *Dragonhyde Putty*, we observed that the hoof hygiene issue has improved significantly.
